

ONE STEP AHEAD

COMPOSITE CONSTRUCTION MATS
MINIMUM IMPACT. MAXIMUM ACCESS.

NEW SOUTH

MINIMUM IMPACT. MAXIMUM ACCESS.

ACCESS SOLUTIONS

New South Equipment Mats provides unique, affordable access and construction matting solutions that are **eco-friendly** and minimize downward pressure.

With our **total project approach**, we design and execute solutions built around project and customer needs. Through the deployment of our matting products in strategic markets throughout North America, we can respond quickly and efficiently to a variety of challenging projects. New South's freight department has over 200 successful freight partners, providing our customers with **reduced freight costs** and deliveries that are **on time!**

What Our Customers Say

“ Without SureTrak™ mats, we would not have been able to access the job site, and we could not afford the loss of work days due to weather delays. SureTrak™ mats enabled us to take our pump service rig onto wet ground without the risk of damaging the ground or getting the rig stuck and having to worry about tow truck bills. New South's SureTrak™ mats helped us save both time and money. ”

- Ryan Henderson
Donald Smith Co.

“ TuffTrak™ mats are lifesavers. The size and composition of the mats make them easy to load on a truck and move around the job site. I have run anything from fully loaded concrete trucks to large drilling rigs on the mats multiple times without any problems. We have used other composite mats in the past but TuffTrak™ mats are the best we've used. ”

- Paul Pugh
Power Source

“ SureTrak™ mats have proved to be a superior product for our use as an electrical transmission contractor. The benefits of SureTrak™ mats are unsurpassed as they are lighter, more durable, have a non-slip surface, much easier to handle and do not damage sensitive areas. When you don't need a forklift to move a mat, you've saved a project manager time, money and scheduling issues. And, the durability of these mats is hard to compete with - we have never had one break. ”

- Jimmy Bowen
L.E. Myers

“ I like the TuffTrak™ mats much more than other composite mats we have used in the past. TuffTrak™ mats are much more durable and have much better traction - they simply don't tear up and break like hollow composites. ”

- John Delay
R. W. Harris, Inc.

MAT USES

- Utilities
- Oil & Gas Exploration
- Civil Construction Contractors
- Construction Companies
- Energy Drilling Contractors
- Pipeline Contractors
- Well Water Contractors
- Emergency Response
- Disaster Relief Efforts
- Event Companies
- Staging Companies
- Production Companies
- Stadiums
- Parks
- Landscapes
- Arborists & Tree Care Specialists
- Military Units
- Modular Office Trailers & Mobile Homes
- Structural Movers

Ground Access Mats

The Fast and Safe Way Forward

- Low transportation & handling costs
- Easier to move - lighter with more handles
- Quick and easy to install
- No ground preparation required
- 10-year field life
- Industry superior traction maintains maximum vehicle grip
- Bears loads up to 175,000 lbs.

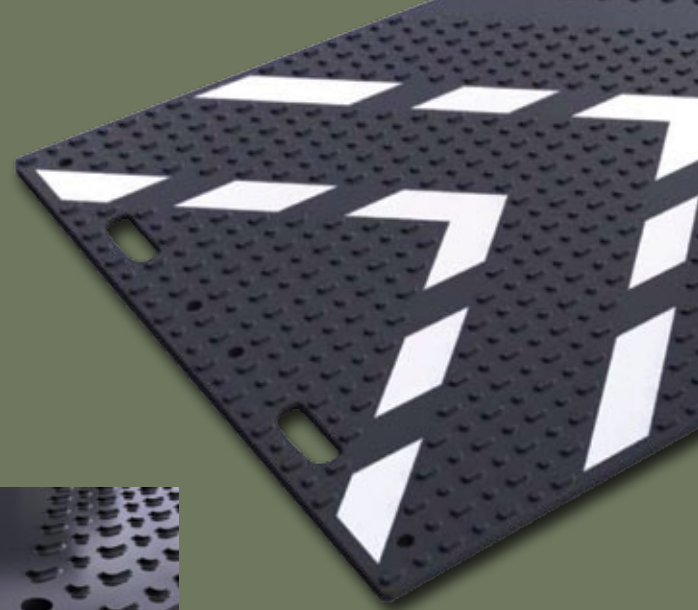

SureTrak™ Features

	Thickness	Dimension (w x l)	Weight per mat
SureTrak™ Standard	.5"	4' x 8'	79 lbs
SureTrak™ Pedestrian	.5"	4' x 8'	79 lbs
Material	Recycled or Virgin High Density (HD) Polyethylene - 100% recyclable		
Colors available	Black for recycled HD Polyethylene; choice of colors for Virgin HD Polyethylene		
Optional extras for connectivity	Standard connectors - 2 way and 4 way - for longer-term connection Metal connectors for heavy and tracked equipment 'Quick Fit' connectors for fast installation Metal U pins for slopes and cambers		
Optional extras	Non-slip reflective markings and 'cats eyes' for night safety		
Environmental features	Weather proof, water and chemical resistant; HD Polyethylene is resistant to acids, alkalis & solvents		
Customization	Corporate logo and contact details can be added at low cost; subject to minimum order		
Guarantee	5-year warranty with a field life of 10 years when used as recommended		

Customizable for Any Job

SureTrak™ mats offer various connection options, depending on the length and scope of a project, the terrain, and the equipment. Our mats are offered in a variety of colors and may be customized with a corporate logo and contact information.

Can Be Used Multiple Times	Yes	No

TUFFTRAK®

TUFFTRAK XL™

Heavy Duty Access Mat

Rugged, Reliable Protection

- Made of chemically inert material that is ideal for eco-sensitive areas
- Does not conduct electricity - a significant benefit for those working with power lines
- Handles all types of equipment including excavators, heavy machinery and vehicles, cranes, and drilling rigs
- Only solid constructed heavy duty access mat on the market - TuffTrak® and TuffTrak XL™ mats are basically indestructible and protect against invasive species and chemicals
- Bears loads up to 300,000 lbs.

TuffTrak® and TuffTrak XL™ Features

	Thickness	Dimension (w x l)	Weight per mat
TuffTrak®	1.5"	10' x 8'	639 lbs
TuffTrak XL™	1.75"	13' x 6.5'	794 lbs
Material	100% Recycled or Virgin High Density (HD) or Ultra High Molecular Weight (UHMW)		
Colors available	Black for recycled HD Polyethylene; choice of colors for Virgin HD Polyethylene		
Optional extras for connectivity	'Drop in' bolt connectors; metal connectors for heavy and tracked equipment; high tensile 'flex' straps for increased safety and maximum stability		
Optional extras	Non-slip reflective markings and 'cats eyes' for night safety		
Environmental features	Weather proof, water and chemical resistant; HD Polyethylene is recycled and resistant to acids, alkalis & solvents		
Traction	Raised nubs for efficient traction and mud dispersal; reversible pedestrian surface		
Guarantee	1-year warranty with a field life of 10 years when used as recommended		

Highly Efficient and Practical

TuffTrak®'s uniquely engineered surface profile is designed to deliver maximum traction, dispel mud during vehicle traverse, reduce sideways movement and slippage, and deliver optimal forward traction. TuffTrak® mats are especially effective on very soft or wetland environments, greatly reducing the amount of rutting and damage large equipment can do to a job site. The mats are reversible, offering a longer potential field life.

What is the danger of invasive species?

Invasive species can pose a threat to wildlife and the environment when compromised mats are moved from one location to another. They compete with native species endangering wildlife and have been responsible for changing the water flow and quality of lakes. This threat to the environment can cost corporations millions in fines and penalties.

Compare & Save

TuffTrak®

- Reduces transportation costs as we can ship more mats per load compared to other composite mats on the market.
- More weight bearing than other composites

TuffTrak XL™

- 25% more liner footage per truckload = a huge savings!
- Mat size designed to fit more job requirements

TuffTrak® mats are the **best value** for composites on the market - bar none!
